

## CHECKING IN WITH LESLIE

Dear friends and supporters,

I wanted to take a moment to share something that's been on my mind lately. You may have noticed that we've been emphasizing the word "Independent" in our recent newsletters, and I want to explain why.

We are fiercely proud to be an independent, woman-owned business. It's not just a label to us; it's a way of life. We have deliberately chosen not to join the ranks of the big corporations or chains.

Why, you may ask? Because we believe in putting people first. Our patients, clients, and employees are our top priority, and we refuse to compromise on that. By staying independent, we can make decisions that are in the best interest of the people we serve, rather than answering to shareholders or corporate overlords.

What does this mean for you?

It means that when you come to our clinic, you're not just a number or a dollar sign. You're a valued member of our community, and we treat you as such. It means that our team is made up of people who live and work in this community, and who are invested in its success. And it means that we can provide the most highly skilled and dedicated therapists and veterinarians in California, because we invest in their education and development.

I want to thank you for your continued support of our independent business. It means the world to us, and we couldn't do what we do without you.

Warmly,  
Leslie

## TAILS OF SUCCESS

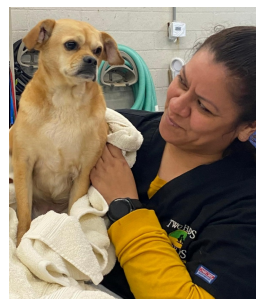

### Way to Go, Miss Fio!!!

A few months after FHO surgery, Fio came to 2H4P to build strength and get over that last hump of healing. It has been about six months and Fio is doing great! She whips through her exercises and struts in the water treadmill. Such a strong lady!!!

### Cassie's Big Weight Loss

Upon adoption, Cassie was twice the size of a healthy puggle, and her joints were hurting from the excessive weight. It took nearly a year for Cassie to shed half her weight. We are very proud of Cassie and her family's hard work.

## PRODUCT OF THE MONTH

### Myos Canine Muscle Formula

- Helps patients gain muscle mass.
- Improves mobility.
- Boosts recovery from injury.
- All-natural, steroid-free.
- Very popular! Clients love the results!

## NEW PARTNERSHIP

### One Step Beyond!

This could be something big. We've begun working with 3D Pets, a design firm that can print and build front-limb prosthetics. This is leading-edge stuff! Navi has been a wonderful patient as we learn and improve. His torso was scanned with a human-grade app from Comb, and then 3D Pets worked their magic with our object files and their 3D printer. Stay tuned as we get this dialed in. This could be huge!

## FOUNDATION CELEBRATION

**It has been an exciting couple of weeks with a lot of positive moves:**

- Tofu has been adopted!
- Spruce is thriving in foster care (possible adoption).
- Chloe also in foster care receiving lots of love.

**Thanks for reading,  
Leslie & The Two Hands Four Paws Team**
