

# TWO HANDS FOUR PAWS

*"Helping Animals Get Better...One Paw At A Time."*

## MESSAGE FROM THE BOSS

Dear Friends,

Well, the good news I wrote about last month is in process, and we think that our friends and donors are going to be very excited. We will fill you in as soon as we can!

Our marketing team has done an amazing job of fundraising for little Tofu. We hope you've had a chance to come in and see the amazing Valentine-themed donor wall that we created. Thanks to your generous donations, Tofu is having his surgery this week to remove his ear canal and anal gland tumor. Once he gets through this, he will be looking for his forever home, even though we think he is pretty happy at the clinic roaming the hallways looking for snacks. Go, Tofu, go!!!

Sweet Chloe went back to the eye surgeon who fixed her injured eye. If you will remember the original vet that saw her had wanted to remove her eye after she had been hit by a car and suffered severe head trauma. Not on our watch! We took her to a great specialist, and her eye is perfect now. The wonderful news is that she can also go in the water and she is starting to use her injured leg like a champ!

And finally, I cannot fully express how grateful I am for our two supervisors, Maurice and Diana. They have been so caring and professional during what has been a crazy few weeks of boarders, puppies, seniors, surgeries, bandage changes, new clients, new employees, and stressed out business owners. We could not do what we do without them. Thank you both SO MUCH!

Onward!

Leslie

## PRODUCT OF THE MONTH

### Help Em Up Harness

Whether your pet is suffering from muscle loss or pain, it may be beneficial to provide a little extra support to stand up, get into a car, climb stairs or assist with balance.

One valued tool is the Help Em Up Harness that has two separate pieces that wrap around both the front end as well as the backend. Equipped with handles, pets can receive a little or a lot of help where they need it most.

Size matters, so give us a call and we can help pick out the perfect mobility aid.

## QUICK HITS

### Much To Share

- Dr. Dixon will be at the clinic providing relief support for us before she relocates to the East Coast. Check with the front desk for available acupuncture appointments!
- Our dear friend and veterinarian, Dr. Helen Chiu, made a surprise appearance by coming back from Alaska for a week. We loved the day she spent with us, staff and our patients.
- Foundation dog Goose had his stitches removed so the cone is gone. Our beleaguered ankles and calves will all breathe a sigh of relief.
- Fun Swim population keeps growing. Harley and Mei Mei joined the ever-growing crew. And a Valentine-themed week was a big splash!
- New addition to Leslie and Bryan's family is a gorgeous young dobie named Georgia. Come meet her!
- Ash and Hamilton received their new custom stifle braces. A very special front leg brace for Foundation dog Chloe should arrive any day.
- Ace and Zar rolled out of here in their new carts

## FOUNDATION CELEBRATIONS

We are so close to our goal of \$10K for Tofu's ear and anal gland surgeries. Our generous community is making this possible. Thank you very much!!!

To help us get to that final destination, please donate.  
No amount is too small.

While all our other foundation dogs have been in and out of the vet offices, sweet Lila has been patiently awaiting her retirement. Well, we are happy to report that this gal left the clinic!!! Miss Lila was adopted and is already living her best life, as she continues to rest and recover from heartworm disease.

A wonderful and compassionate woman who has been grieving the loss of her dog companion, needed a boost. She said Lila will heal her broken heart as she will help Lila with her heart. Just in time for a Valentine Day celebration of love!!!
